**DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO**

---

TEST BOOKLET  
GENERAL STUDIES  
Paper-I

**D**

**Time Allowed : Two Hours**

**Maximum Marks : 200**

---

INSTRUCTIONS

1. IMMEDIATELY AFTER THE COMMENCEMENT OF THE EXAMINATION YOU SHOULD CHECK THAT THE TEST BOOKLET *DOES NOT* HAVE ANY UNPRINTED OR TORN OR MISSING PAGES OR ITEMS, ETC, IF SO, GET IT REPLACED BY A COMPLETE TEST BOOKLET.
2. **Please note that it is the candidate's responsibility to encode and fill in the Roll Number and Test Booklet Series A, B, C or D carefully and without any omission or discrepancy at the appropriate place in the OMR Answer Sheet. Any omission/discrepancy will render the Answer Sheet liable for rejection.**
3. You have to enter your Roll Number on the Test Booklet in the Box provided alongside . *DO NOT* write *anything else* on the Test Booklet.
4. This Test Booklet contains **100** items (questions). Each item comprises four responses (answers). You will select the response which you want to mark on the Answer Sheet. In case you feel that there is more than one correct response, mark the response which you consider the best. In any case, choose *ONLY ONE* response for each item.
5. You have to mark all your responses *ONLY* on the separate Answer Sheet provided.
6. **All** items carry equal marks.
7. Before you proceed to mark in the Answer Sheet the response to various items in the Test Booklet, you have to fill in some particulars in the Answer Sheet as per instructions sent to you with your Admission Certificate.
8. After you have completed filling in all your responses on the Answer Sheet and the examination has concluded, you should hand over to the invigilator only the *Answer Sheet*. You are permitted to take away with you the Test Booklet.
9. Sheets for rough work are appended in the Test Booklet at the end.
10. **Penalty for wrong Answers :**  
THERE WILL BE PENALTY FOR WRONG ANSWERS MARKED BY A CANDIDATE IN THE OBJECTIVE TYPE QUESTION PAPERS.  
(i) There are four alternatives for the answer to every question. For each question for which a wrong answer has been given by the candidate, **one-third** of the marks assigned to that question will be deducted as penalty.  
(ii) If a candidate gives more than one answer, it will be treated as a **wrong answer** even if one of the given answers happens to be correct and there will be same penalty as above to that question.  
(iii) If a question is left blank, i.e., no answer is given by the candidate, there will be **no penalty** for that question.

---

**DO NOT OPEN THIS BOOKLET UNTIL YOU ARE TOLD TO DO SO**

## Model Test Paper 58

### General Study Paper I

<p>80. Which of the following facts are correct about speed and velocity?</p> <ol style="list-style-type: none"><li>1. Speed is the distance travelled by a body in a particular time</li><li>2. Speed must be in a particular direction</li><li>3. Velocity is the speed in a particular direction</li><li>4. Both speed and velocity depend on distance and time</li></ol> <p>(a) 1, 2 and 3 (b) 2, 3 and 4 (c) 1, 3 and 4 (d) 1, 2, 3 and 4</p> <p>81. Vaccines are used to build immunity to disease by</p> <p>(a) simulating disease in the body to produce antibodies (b) injecting antibodies in blood stream (c) enhancing immunity by a large dose of vitamins (d) enhancing immunity by a large dose of enzymes</p> <p>82. Rate of cooling of a body depends on</p> <p>(a) Its size and the velocity of air around it (b) Difference in temperature between the body and the surroundings (c) Method of heat transfer (d) Is independent of the temperature of surroundings</p> <p>83. An aircraft, which is heavier than air, flies in air due to</p> <p>(a) Buoyancy (b) Forward motion of the aircraft (c) Difference in pressure on the upper and lower sides of the Wings (d) Jet propulsion</p> <p>84. Woollen clothes keep us warm during winter, which of the following facts is incorrect?</p> <p>(a) Wool is a bad conductor of heat (b) Electro-static charge of fibres retains heat (c) Wool keeps air trapped in its fibres</p>	<p>(d) Wool resists escape of body heat to environment</p> <p>85. Densities of water and ice are</p> <p>(a) Equal (b) Different (c) Can be equal or different (d) None of the above</p> <p>86. Which of the following statements are correct about the atom?</p> <ol style="list-style-type: none"><li>1. Atom is the smallest particle of an element</li><li>2. Atom can retain chemical properties of the element</li><li>3. The typical sizes are around 10pm</li><li>4. Atoms have well defined boundaries</li></ol> <p>(a) Only 1 (b) 1 and 2 (c) 1, 2 and 3 (d) 1, 2, 3 and 4</p> <p>87. At what temperature do the Celsius and Fahrenheit scales will read the same?</p> <p>(a) -32 degree (b) 32 degree (c) 40 degree (d) -40 degree</p> <p>88. Which of the following was not part of Gondwanaland (South Pangaea)?</p> <p>(a) North America (b) Africa, Madagascar (c) Peninsular India (d) Australia and Antarctica</p> <p>89. How many major plates are found in the lithosphere?</p> <p>(a) 4 (b) 5 (c) 6 (d) 7</p>
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

**Model Test Paper 58**  
**General Study Paper I**

<p>90. The concept of sea floor spreading was propounded by</p> <p>(a) W. J. Morgan (b) Le Pichon (c) H. Hess (d) Mckezie</p> <p>91. Which one of the following statement is true of braided streams?</p> <p>(a) Width of the channel is less than its depth (b) Width and depth of the channel are equal (c) Width of the channel is greater than its depth (d) Width of the channel is unrelated to its depth</p> <p>92. In which of the following frequency ranges the human ear is most sensitive to noise?</p> <p>(a) 1 - 2 KHz (b) 3 - 4 KHz (c) 10 - 12 KHz (d) 13 - 16 KHz</p> <p>93. A seismogram records the following types of earthquake waves</p> <p>(a) L - waves (b) P - waves (c) S - waves</p> <p>The correct chronological sequence of the arrival of these waves is :</p> <p>(a) (b), (c) and (a) (b) (b), (a) and (c) (c) (c), (a) and (b) (d) (a), (b) and (c) arrive at the same time</p> <p>94. Consider the following about the Himalayan orogeny:</p> <p>(a) The orogeny resulted from the southward movement (b) The orogeny began about 25 million years ago (c) The orogeny closed about 1 million years ago (d) The Himalayas have a root of relatively light crustal rocks projecting into the denser mantle</p> <p>Which of the following combinations is correct?</p> <p>(a) (a) and (b)</p>	<p>(b) (c) and (d) (c) (a) and (c) (d) (a), (b) and (d)</p> <p>95. Winds blowing down an incline often due to cold air drainage are called</p> <p>(a) Anabatic winds (b) Mountain winds (c) Cyclonic winds (d) Katabatic winds</p> <p>96. The presence of pneumatophores is seen in</p> <p>(a) Desert plants (b) Climbers and lianas (c) Trees of tropical moist forests (d) Mangroves</p> <p>97. Oxygen toxicity (in humans) is caused by</p> <p>(a) Inhalation of molecular oxygen (b) Generation of free radicals (c) Interactions of singlet oxygen with membrane (d) None of the above</p> <p>98. Which of the following shows bioaccumulation and contaminate food chains?</p> <p>(a) Pesticides (b) Polychlorinated biphenyls (c) POPs (d) All of the above</p> <p>99. Removal of which of the following impurities from contaminated water requires the of coagulants</p> <p>(a) Colloidal impurities (b) Dissolved solids (c) Micro organisms (d) All of the above</p>
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

100. The following is a slow release Nitrogenous fertiliser

- (a) CAN
- (b) Urea
- (c) Ureaform
- (d) Anhydrous Ammonia
